

Iron County, WI

Request for Proposals for Two PLSS Corner Remonumentation,
Perpetuation, Documentation, Coordinates, and Maintenance
Projects 2017

Iron County GIS Office
300 Taconite Street
Suite 113
Hurley, WI 54534

Project Services Specifications

Iron County is requesting proposals for the remonumentation, perpetuation, documentation, coordinates, and maintenance of PLSS corners within Iron County to be completed by March 01, 2018. There are two Project Areas, with specifics on each listed below. The subject corners are all the original PLSS section corners, quarter-section corners, and meander corners in the Project Area. There are several corners in both Project Areas that already have survey-grade coordinates and do not need to be redone. See the attached maps.

Project Areas

Project 2017-A is the Township T41N R3E, Iron County, WI. Preference may be given to bids that contain a contiguous block of sections covering the unincorporated community of Springstead. Iron County currently projects to have \$50,000 in available grant funds for this project.

Project 2017-B is the partial Townships T46N R2E and T46N R3E, Iron County, WI. Preference may be given to bids that contain a contiguous block of sections covering the cities of Hurley and Montreal. Iron County currently projects to have \$43,000 in available grant funds for this project.

Professional Services

The successful consultant, acting under the authority and approval of Iron County, will perpetuate / monument subject corners and any necessary additional controlling corners. The consultant is allowed to choose which corners will be completed in what order with the intent that as many full sections be completed where possible in the final product.

The successful consultant must provide all necessary hardware to monument and witness the corners. Minimum monument requirements:

Minimum Length: 30"

Weight: 1.13 lbs / lineal foot

Examples: $\frac{3}{4}$ " x 30" iron rebar, 1" o.d. x 30" iron pipe

Other types of monuments may be used if they exceed the minimum requirements.

Aluminum pipes or rods may also be used if they are at least 1" o.d. x 30" long (aluminum pipe) or $\frac{3}{4}$ " x 30" long (aluminum rod) with a stamped cap with a permanently affixed magnet.

Monuments must be capped with an aluminum or brass cap stamped to indicate the Township/Range, Section number(s), and type of corner (Section, Quarter, Meander, etc.). If the corner is already marked by a sturdy corner marker, no new monument is necessary. Any insecure (wobbly) existing corner markers must be reset in a sturdy manner or replaced. A sign post with a "Survey Marker/Monument" sign must be set in close proximity to the corner monument, if none already exists. Also a bearing tree sign must be placed on each bearing tree, if none already exist. Sign posts and/or bearing tree signs are not necessary in situations where its location would be a hindrance or an eyesore to a landowner.

Corners may be existent, obliterated, or lost. Any necessary research and field work is the responsibility of the successful consultant. Some corners have existing monument records.

Others are shown on survey maps, but no monument record has been filed. The existence of others is unknown.

It may be necessary to establish adjacent controlling corners in order to establish the subject corner. The establishment of all corners shall be completed by the proper methods as laid out by the United States, the State of Wisconsin, and all other rules and regulations pertaining to the retracing of original government surveys. Any controlling corner used to establish any of the subject corners, whether by proportionate measurement, record bearing and distance, or by other means are considered part of the Project. Controlling corners must be monumented and may not be “theoretical” or “calculated positions”. If a corner is on the attached map as a corner with existing coordinates, it does not need to be remonumented or signed, even if used as a controlling corner. Any costs associated with controlling corners shall be considered incidental and included in the total cost.

A U.S. Public Survey Land Monument Record must be prepared for each of the subject corners and for any used controlling corners, if none already exists. U.S. Public Survey Land Monument Records must be prepared according to Wisconsin Chapter AE-7.08. Iron County Coordinates in U.S. Survey Feet, NAD 83/91 must be supplied for each of the subject corners and for any used controlling corners. Coordinates must be listed on the face of the U.S. Public Survey Land Monument Record.

Accuracy Specifications

As these projects are being funded by the Wisconsin Land Information Program Strategic Initiative Grant, the final products must meet their accuracy standard. All corner coordinates shall meet or exceed the Survey Grade Definition as described by the Wisconsin County Surveyors Association Survey Grade Definition, Version: December 2015. “Coordinates collected under the direction of a Professional Land Surveyor ... and obtained by means, methods, and equipment capable of repeatable two-centimeter or better precision.”

Definition of Delivered Product

Delivered products shall consist of the completed U.S. Public Land Survey Monument Records with Iron County Coordinates as specified above. The delivered products are defined as fully reviewed and completed by the County within 60 days of receiving data.

Ownership of Finished Product

All delivered products, documentation, and intellectual property resulting from this project will become the property of Iron County, Wisconsin.

Alternative Methods

Prospective bidders may propose alternative methods based on the terms of this document for any part of the project. Alternative proposals must include complete documentation and methodology, as well as exact specifications and final output. The alternative methods shall exceed any specification listed herein.

Submitting Bids

The intent of Iron County is to award each Project under its own contract. Bidders may submit a proposal for one or both Projects. If bidders wish to bid on both Projects, separate proposals must be submitted, but supporting specifics (items c through e listed below) need only be submitted with the first proposal. Proposals must include the following:

- a. A list of which sections in the Project can be completed for the total projected funds listed above. In the event that a bidder can complete the whole Project for less than the total, specify a bid amount to complete the Project. The County may then decide to offer additional corners to the successful consultant to reach the total. The consultant may choose to complete the additional corners.
- b. Organizational information including contact person.
- c. Provide brief resumes of project staff.
- d. Explanations and methodologies of all processes and equipment to be used.
- e. References. Provide at least two recent or ongoing projects that are similar in scope to this project.

Questions should be submitted to Neil Martinko, Iron County GIS Office, at the address below, or by phone: (715) 561-5803.

Deadlines

Bids must be received at the Iron County GIS Office by 4pm Central time, February 03, 2017. Bids will be reviewed at an Iron County Land Information Council meeting the following week.

Iron County GIS Office
Project 2017-A Bid
300 Taconite Street
Suite 113
Hurley, WI 54534

In the event that the GIS Office is closed, bids may be given to the Iron County Clerk or their Deputy, or the Iron County Register of Deeds or their Deputy.

Only sealed bids will be accepted. Faxes or emails will not be accepted.

The entire project must be completed before March 01, 2018.

Subcontractors

All potential subcontractors must be identified by name, address, primary contact, telephone number, and what part or parts of the project they might be assigned. Unless identified, no part or parts of the project may be subcontracted without the written permission of Iron County.

Availability of Funds

Iron County reserves the right to reject any and all bids for any reason, and makes no representation that funds are currently available or will be appropriated to pay for the requested project. Iron County reserves the right to scale back the project, or to offer an expansion of the project to the consultant, based upon available grant funds.

Insurance Requirements

The consultant shall provide a Certificate of Insurance to the County. The limits of coverage shall meet or exceed the following requirements:

Workers Compensation & Employer's Liability

Coverage A:	Statutory
Coverage B:	\$100,000

General Liability

Bodily Injury, Personal Injury, Property Damage Limit	\$1,000,000 Each Occurrence Combined Single
--	--

Automobile Liability

Bodily Injury, Property Damage Limit	\$300,000 Each Occurrence Combined Single
--------------------------------------	--

Umbrella

Excess Liability Insurance Limit	\$1,000,000 Each Occurrence Combined Single
----------------------------------	--

Hold Harmless / Indemnification

The consultant will indemnify and save harmless Iron County and all of its officers, agents, and employees from all suits, actions, or claims of any character brought for or on account of any injuries or damages received by any persons or property resulting from the operations of the consultant, or their agents, in prosecuting work under this agreement.

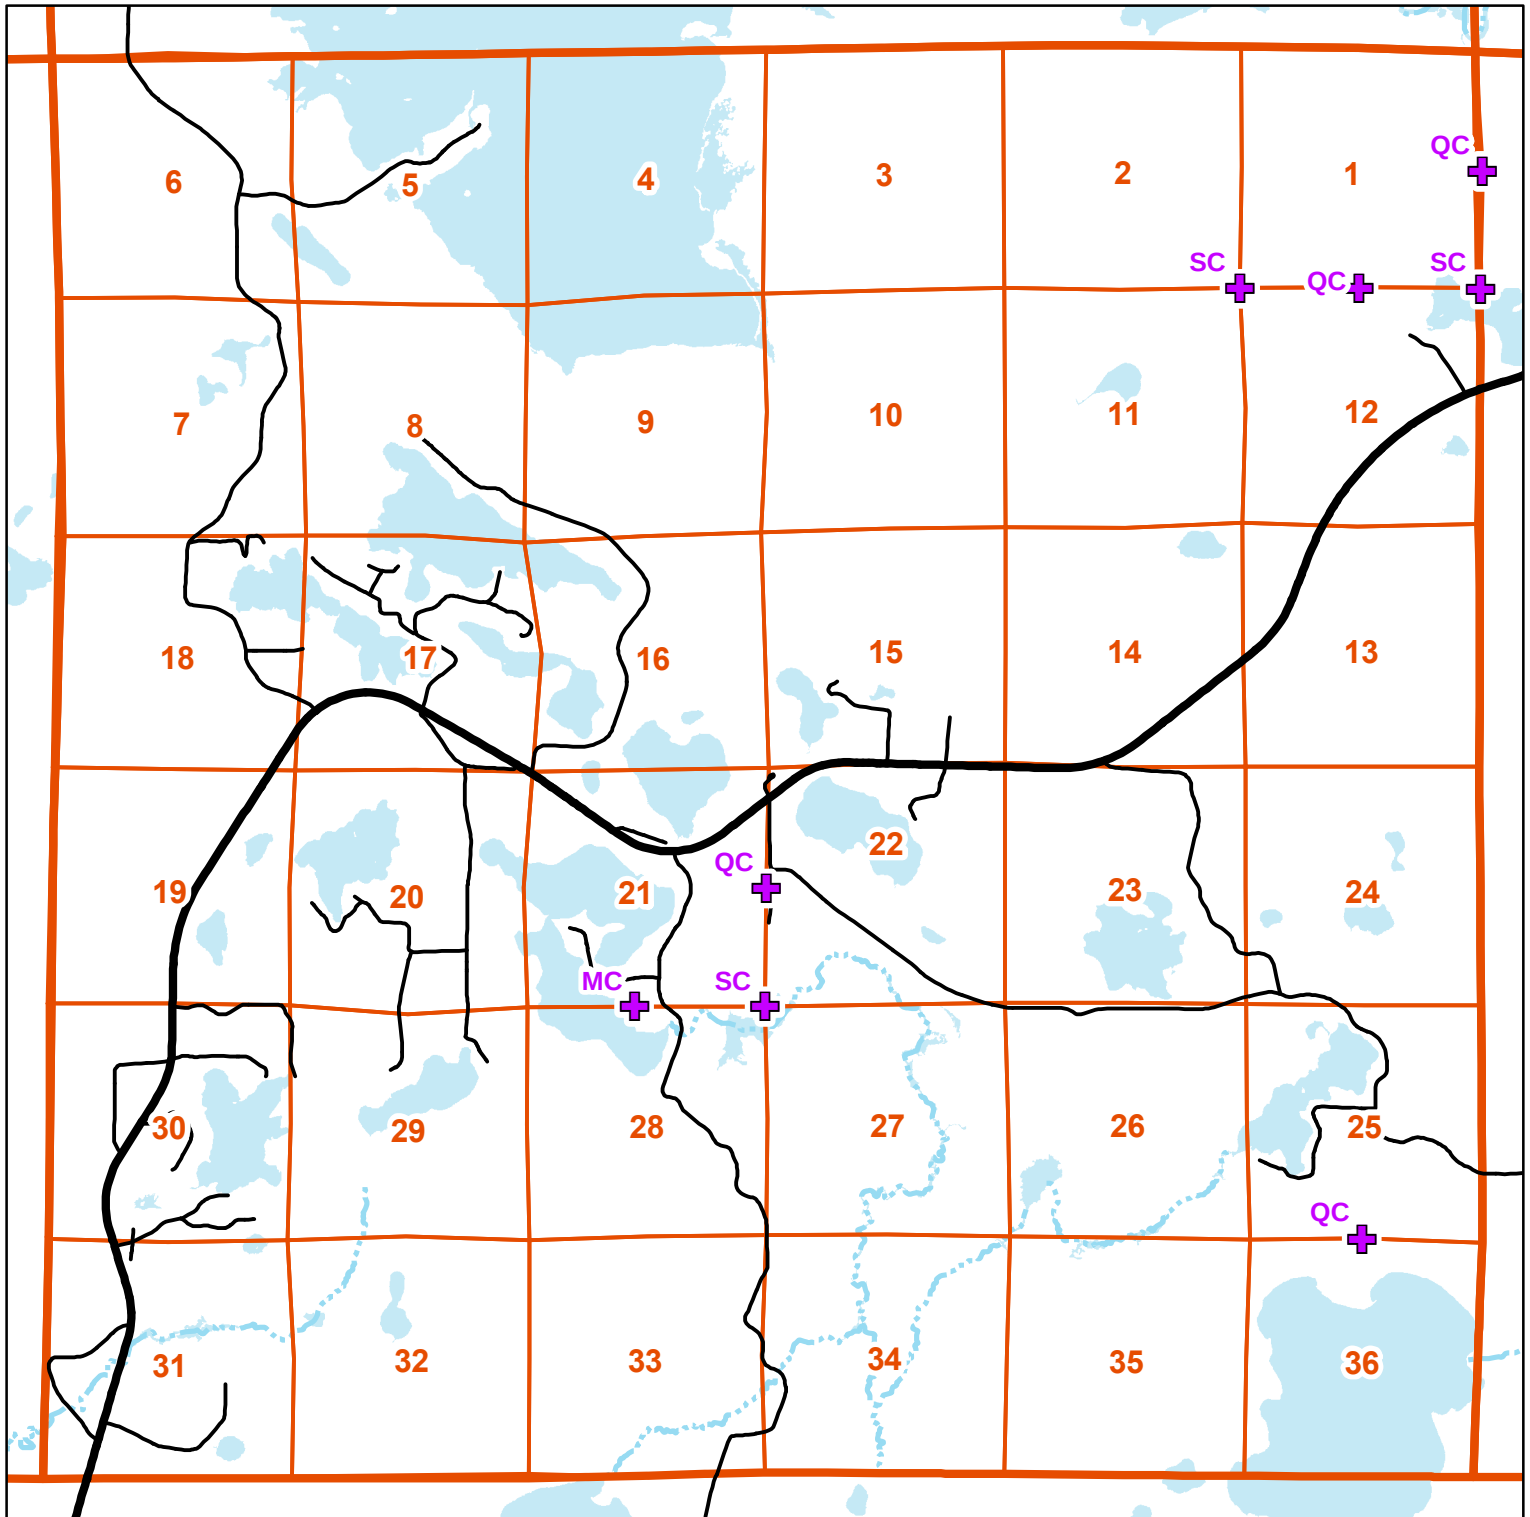

Criteria for Award

Iron County openly solicits the best possible value on all requests for proposal. Iron County reserves the right to accept or reject any or all proposals and to negotiate the terms of the proposal with a proposer as deemed in the best interest of the County. Awards will be based upon price, ability, qualifications, and experience of the consultant.
